

Deals
in Orbis
Students Manual

Orbis provides information for both public and private companies. To access M&A deals datasets, navigate to the top-right corner of the page and switch from companies to the M&A deals dataset.

Following that, you will be directed to a page displaying all the available variables for filtering the dataframe.

After specifying all the variables, you can view the final row count. Click on 'View Results' to access the conclusive dataframe.

Result for:	Step	Search
>	12,453	12,453
Total:		12,453

VIEW RESULTS >

During this stage, you have the option to append extra columns for supplementary details about the deals or incorporate additional filters to modify the dataset size.
