

Indices

in Eikon with Datastream

Students Manual

To access information about Equity Indices in Datastream via Excel, navigate to the "Time Series Request" in the "Refinitiv Eikon Datastream" window. Select "Equity Indices" from the "Category" dropdown menu.

Click "Find Series" to locate the desired indices. Use the "Datatypes" option to select variables for the chosen indices to export.

Category	Multiple
Bond Indices	79 283
Bonds & Convertibles	4 334 843
Commodities	168 321
Constituent Lists	314 119
Credit Default Swaps	133 388
Economics	19 552 928
Equities	332 971
Equity Indices	396 779
Exchange Rates	15 288
Funds	795 542
Futures	449 855
Interest Rates	51 686
Investment Trusts	3 233
Options	16 738 707
User Created Indices	9
User Portfolios & Lists	493
Warrants	5 227 724

In the newly opened window, you'll initially see the most frequently used indices. Click on the blue link ("Symbol") to add a single index or tick the boxes next to multiple indices, then click "Use" to add them to the export list.

Under "Data Series," select "Equity Indices" in the top left corner to filter variables by category.

The screenshot shows a software interface for selecting data series. On the left, a vertical menu lists various categories: Bonds & Convertibles, Bond Indices, Credit Default Swaps, Commodities, Economics, Equities, Equity Indices (highlighted), Exchange Rates, Futures, Interest Rates, Investment Trusts, Options, Funds, User Created Indices, Warrants, and User Created Time Series. Below this menu is a 'Source' section with counts: IBES (751), Datastream (130), and MSCI (34). On the right, a table titled 'Equity Indices' displays a list of series. The table has columns for Name, Symbol, Type, Source, and Currency. The series listed include MSCI Total Return Index (MSRI), Code - Isin (ISIN), Dividend Yield (DY), MSCI Net Daily Return (MSND), MSCI Net Return (MSNR), MSCI Number Of Equities (MSNE), MSCI Price Index (MSPI), Market Value (Capital) (MV), Net Return (NR), Price - Intraday High (PH), Price - Intraday Low (PL), Price - Opening (PO), Price Index (PI), Price/Cash Earnings Ratio (PC), and Price/Earnings Ratio (Adjusted) (PE). Each row includes a star rating and a checkbox.

In the final window of the time series request, specify the "Start Date," "End Date," and "Frequency." If you don't specify the "End Date," the results will be derived up to the current day.

The screenshot shows a 'Time Series Request' dialog box. At the top, there is a 'Toggle to Static Request' button. The 'Request Details' section includes a 'Series/List' dropdown with 'MSWRDLS' selected, a 'Datatypes/Expressions' dropdown with 'PH' selected, and a 'Find Series' button. Below these are 'Start Date' (set to '-2Y'), 'End Date' (empty), and 'Frequency' (set to 'Daily'). The 'Options' section contains several checkboxes: 'Display Custom Header' (unchecked), 'Display Row Titles' (checked), 'Display Column Titles' (checked), 'Display Headings' (unchecked), 'Transpose Data' (unchecked), 'Display Code' (unchecked), 'Display Currency' (unchecked), 'Display Latest Value First' (unchecked), 'Hyperlink to Series Metadata' (unchecked), 'Hyperlink to Datatype Definition' (unchecked), 'Display Expression' (radio buttons for '1st Series' and '1st Series & Description', with '1st Series & Description' selected), 'Display Datatype' (radio buttons for 'Description' and 'Mnemonic', with 'Description' selected), 'Embed Formula' (checked), 'TS Format' (radio buttons for 'Yearly-Date', 'Quarterly-Date', and 'Monthly-Date', with 'Yearly-Date' selected), 'Auto Refresh' (checked), and 'Auto Resize Destination Range' (unchecked). There is also a 'Not Available String' section with radio buttons for 'Value in Settings' (selected) and 'Value'. At the bottom, there are buttons for 'Help', 'Default Option', 'Submit', and 'Cancel'.
