The user interface is different in Workspace since it combines time series and static requests into one menu, but the Datastream Navigator and formulas are the same.

Any spreadsheets you created with the old **Datastream** should be fully compatible with Workspace.

<u>This document</u> from ESDC Rotterdam provides additional screenshots and instructions. Once you have read these instructions you can continue to use this Students manual for Datastream.

To access information about Equity Indices in Datastream via Excel, navigate to the "Time Series Request" in the "Refinitiv Eikon Datastream" window. Select "Equity Indices" from the "Category" dropdown menu.
